Application

MegaTron MT touch screen controller is the industry leader in user friendly capability and flexibility with a large color touch screen.

Units can be configured to control a wide range of digital and analog inputs. Advanced relay logic and customization lets you configure a unit to meet your specific system needs.

MT touch units can control single or multiple tower, boiler, waste water and other industrial applications and provide web based communications and reporting with WebAdvantage.

Build a Model

Units can be configured to control 1-4 systems. The model number starts with **MT** followed by the code for each function needed for the first system (**MTCPF3E**).

If building a multi-system unit, put a - after the functions of a system and list the functions for the next system (**MTCPF3E-B2F2**). If systems are the same, just put a -**X2,3** or **4** after a system (**MTCPF3E-X2**). After main control functions have been selected, insert a - and list the desired common options (**MTCPF3-CF3E-N4**).

Conductivity Control (1 per system max)

- B2** = BE-32 Standard Boiler probe
- C** = TE-4A Standard Tower probe

Make-up or Misc Conductivity (1 per system)

- M** = DI-4A Standard make-up probe

PH Control (1 per system / 2 max)

- P** = TPE-21 Standard Tower probe

ORP Control (1 per system / 2 max)

- R** = TOE-21 Standard ORP probe

Temp (2 max/system – Each conductivity uses one)

- T** = TC-1 Standard temp probe

Feed Timers (max of 5 per system)

- F1 to F5** (F4 = Four feed timers)

Flow Switch

- E** = Flow Switch
